DRAGONFLY® CCTV KIT

CCTV security cameras keep a look out at all times. Day or night, they improve the security of your premises and provide peace of mind for the occupants. Over time however, if the camera is not kept clean the CCTV camera can degrade, becoming dusty and blurred and putting your property at risk. The cameras need to be maintained properly on a regular basis to prevent any malfunction or poor quality footage.

To clean your CCTV camera, our solution is the Dragonfly® CCTV kit. The new Dragonfly® CCTV Cleaning Kit enables you to clean CCTV camera lenses safely from the ground without the need for ladders, scaffold towers, cherry pickers or other expensive lifting equipment.

Reaching heights of up to 10-metres, the Dragonfly® CCTV Cleaning Kit offers a versatile solution to facilities management and security companies to successfully clean cameras in difficult-to-reach and awkward places, both internally and externally.

The Dragonfly® CCTV Cleaning Kit comprises of a small pump with rechargeable battery that has an operating duration of 8 hours when fully charged. The water reservoir, when filled with pure water inside the backpack, will pump the pure water up a telescopic pole to a nozzle alongside a microfiber cup (for dome cameras) and a microfiber pad (for bullet cameras). The nozzle provides a fine mist for the microfiber pad to cut through dirt such as road traffic film, spider webs, general dirt and grime, etc. which allows you to clean cameras at height safely, efficiently and quickly.

Using the control fob supplied you are able to control the amount of pure water applied without the need to collapse the pole to moisten the microfiber pads. The high tech bespoke microfiber pads are gentle on the lenses and are machine washable, minimising running costs. The backpack is lightweight and comfortable to wear, while the pole is made from carbon fibre, which enables the operator to move around large sites freely to clean multiple cameras with minimal interruption or effort. This also means the kit is easy to transport and store due to a collapsed length of up to 1900mm, reaching up to just under 12m in height.

Features & Benefits

- The kit comprises of a carbon fibre telescopic pole, backpack water reservoir and rechargeable battery and pump kit.
- Two different microfibre pads allow flexibility when cleaning different types of CCTV Cameras.
- Guaranteed to increase safety and efficiency of the operator when cleaning CCTV cameras especially when situated in awkward locations
- Easy to transport and to store
- Single Operator
- Streamline® Ova8® Pole included, which gives the operator a lightweight, zero pole sin pole.

Kit No.	Storeys	Collapsed Length	Extended Length	Weight
DRAGONFLY-CCTV-OV22	2	1,500mm / 5ft	6,700mm / 5ft	1.35kg
DRAGONFLY-CCTV-OV25	2	1830mm / 6ft	7,700mm / 25ft	1.35kg
DRAGONFLY-CCTV-OV30	3	1,865mm / 6ft	9,150mm / 30ft	1.70kg
DRAGONFLY-CCTV-OV35	4	1900mm / 6ft	10,700mm / 35ft	2.00kg
