

STREAMVAC™

Internal Dusting Kit

The Streamvac™ internal dry vacuum system allows you to reach up to 10mtrs without the need of ladders or other lifting equipment, and enables you to vacuum up dust and dirt in high level applications.

The modular carbon fibre pole sections are exceptionally light yet very rigid. These simply push into each other, creating a funnel effect, allowing reach up to 10mtr high. Various attachments can be fitted to the end of the pole section with a standard 32mm adapter supplied in the kit. The hose cuff of the vacuum attached to any of the pole sections. Each kit is supplied with a half section too, for versatility of use.

Features

- Powerful 620W motor
- Numatic high-efficiency, long-life motor.
- 10mtr cable for a large working radius.
- Strong and sturdy Ultralite™ carbon fibre poles. (Glass fibre also available)
- High-efficiency, triple-layer HepaFlo filter bags.
- Comes with many attachments so you can have the right tool for the job straight out of the box.
